

ULTRA ACCESS

Ultra Access' Birthday!

And why we specifically chose July 4th to begin our business.

The 4th of July is internationally known (and celebrated) day of independence for the great people of the USA - and we like those American Patriots, feeling a strong bond of kinship with them. This day is also known as the **Fourth of July**.

We all know the story, but a short summary would be: it was a time when a group of people declared that they will not be ruled over by others without representation (or a voice) in Parliament.

The famous saying is "no taxation without representation", which Ultra Access wholeheartedly agrees with.

It's a similar situation in the British Scaffolding Industry, with regards to the boots-on-the-ground scaffolders.

We have HAD no voice in the industry.

Those previously who were seen as "leading the industry" had the considerations of the big contractors first and foremost, and had little thought for working class scaffolder.

We all pay into the industry, collectively to the tune of £ tens of millions through paying for our own equipment, PPE, tools, etc, and the taxes we pay, but rarely have we been given a voice.

So, on July 4th 2022 we began our journey to support EVERYONE within the British Scaffolding Industry.

To not only carry out our numerous (and growing list of) services to the highest standard possible, to the recognised guidance, to try and give a positive example of pride within the trade.

But whilst also trying to increase our influence within this very important industry to champion the daily efforts of the **MOST IMPORTANT PEOPLE IN SCAFFOLDING = the Scaffolders themselves**.

Scaffold Technical Support

These regular (yet sporadic) self-created **UADIP** publications themselves are all designed to give as much information as possible, for free to the scaffolders.

We understand that not every scaffolder is a positive for the industry, we can be our own worst enemies sometimes by how some of us act, and how we are perceived by others in the many wider-sectors that we facilitate...

... but there are many many thousands of good, hardworking, decent, expert scaffolders out there, who've never had the chance to voice their opinions, showcase their knowledge and display their huge wealth of experience... **NOW THEY DO HAVE A VOICE.**

We stand by our pledge to help ALL (including and especially the scaffolders) within the British Scaffolding Industry, because without them, there is no scaffolding industry.
