

ULTRA ACCESS

Whats a "Scaffolding Consultant"?

Key services and criteria that defines the role...

Scaffolding Consultants... what are they?

They are almost exclusively highly experienced and knowledgeable ex-scaffolders who are not able to work (usually due to injuries / physical limitations), or no longer wish to work (usually for monetary or age reasons) "on the tools" anymore.

What services do they provide?

It could be a whole range of services, including:

- Scaffolding Inspections
- Working at Height equipment (mainly Harness and Lanyard) inspections
- Scaffold Supervision (temporary basis / holiday cover)
- Scaffolding Contracts Management (as above, on temporary basis / holiday cover, etc)

With possible other specific specialised services offered also being:

- Scaffold Estimating
- Scaffold Safety Audits
- Scaffold "Compliance" (**NASC** and **Scaffolding Association** membership) audits
- Scaffold Training
- Scaffold Design (including Temporary Works management)

... with this above list of potential services usually experience and/or possible qualification dependent, but or the most-part **good Scaffolding Consultants can turn their hands to almost anything within the industry**, with many being ex-scaffold business owners and/or in upper management roles for various scaffolding contractors in their own right, previously.

You could call them a "jack of all trades"...

ULTRA ACCESS is one such "jack", being decent at most scaffold operational aspects and very good at some overs
Conducting all of the above services, and more which can be found on our website.

Shameless plug we know, but there are many of "us" out there that could save time and money for whatever organisation who acquires their services.

Its not a job that just anyone can do either, or everyone would be doing it - so we advise on doing your own research before engaging in a dialogue - for every good one, there's equally not so good.

Good Scaffolding Consultants also make decent unofficial Safety Advisors too, having built up many years of working in an industry as dangerous and unforgiving as scaffolding.
They have literally bought the t-shirt, especially with how diverse scaffolding work locations can be.

Obtaining the services of a good Scaffolding Consultant and with sufficient time and investment allowed for, can significantly improve the operations of a scaffolding company, project or both.

Theres many advantages of using a Scaffolding Consultancy company / individual, and Ultra Access is open to discussing how we can save you time and money. **Please feel free to get in touch.**
